

# ENDOMETRIOSIS AWARENESS CAMPAIGN 2018

Celebrate Womanhood with us this March as we put the spotlight on Endometriosis (pronounced en-doh-mee-tree-oh-sis) which affects about 10% of women of the reproductive age group. This figure can increase to 30 – 40% for women with infertility problems. This is a condition in which the tissue that lines the womb is found in areas outside it, resulting in painful and heavy menses, painful sex, infertility and ovarian cysts.
